

FlexRoad's matting ease access for track-tors

Hawkes Ltd, a farming business local to Skegness (where FlexRoad UK is based!), was unable to access a slurry lagoon without damaging the surrounding agricultural land or requiring heavier machinery.

Simon, a director at Hawkes Ltd, approached FlexRoad in need of a quick and reliable matting deployment and hire service.

FlexRoad's fast-acting team installed the mats using their purpose-built tool and then left them on site for a hire duration of two weeks.

The mats not only added strength and durability to the ground, enabling equipment to be used without issue, they also protected the environment too – it's a win-win!

We're very happy with the service provided by FlexRoad. The mats we're laid out quickly and made our jobs much easier. We'd definitely use them again!
